Total number of
patients recruited

83

CONGRATULATIONS & THANKS TO ALL

Recruitment for PODCAST ceased on the 31st January 2014, with a total of 83 patients.

Final Steps

Please can each centre check their blood sample freezer log and contact us if there are any samples awaiting collection. Please can you also begin your archiving procedures for the trial paperwork.

RESULTS

PODCAST will be attending the UK Stroke Forum in Harrogate on the 2nd to 4th December. We will be hosting at stand G26 throughout the 3 days and there will be a 'closed' investigators meeting held on 2nd December in the Holiday Inn adjacent to the conference centre, where the results will be presented to those that have completed the non-disclosure agreement. Professor Philip Bath will give the open results on the 3rd December during the presentation at 14:15-15:30 in the Kings Suite.

A further newsletter will be sent out in January with the results for those that cannot make the UKSF.
